### **II. GENERAL REMARKS**

It is respectfully requested that the above-listed patents and publication be given consideration by the Examiner and made of record in the subject patent application.

No inferences should be drawn that the listed patents represent a comprehensive investigation, or that any material disclosed is equivalent to the subject invention. The cited documents disclose numerous specific features. There has been no attempt to list each and every feature disclosed by each document. The Examiner is requested to review the documents and determine the extent of the materiality of the document disclosures with respect to the present invention.

Also, there is reserved the right to later set forth how the instant invention is distinguished over the disclosure of any document or other art, including the disclosures of the art and documents listed herein, that may be cited by the Examiner in rejecting a claim in the instant patent application.

The recitation herein of U.S. patent documents is not to be construed as an assertion that more pertinent art, although unknown to applicants, does not exist.

Respectfully submitted,
